

**Department of Civil Engineering**  
**Semester – I (2016-17)**

**Engineering Geology Session Plan**

S. No	Topics as per the JNTU syllabus		Lecture No.	Suggested Books – Page No.s.	Remarks
	Modules	Sub-Modules			
1	Overview of Subject	Background	L1	T1	
2	Prerequisites, scope & applications		L2	T1	
<b>Unit 1: Introduction to EG and Weathering of Rocks</b>					
3	Importance of Geology from civil engineering point of view	<ul style="list-style-type: none"> <li>• ETD</li> <li>• Geological maps</li> <li>• geological features</li> <li>• Pre-geological survey</li> </ul>	L3	T1-Ch1(5-10)	
4	Brief study of case histories of failure of some civil engineering constructions due to geological drawbacks	<ul style="list-style-type: none"> <li>• St. Francis dam</li> <li>• Halesbar dam</li> <li>• Kaila dam</li> <li>• Kodaganar dam</li> <li>• Tigris dam</li> </ul>	L4,L5	T1-Ch1(5-6)	
5	Importance of Physical geology, Petrology and Structural geology.	<ul style="list-style-type: none"> <li>• Suitability of rocks as building stones</li> <li>• Suitability of sites for dam construction</li> </ul>	L6	T1-Ch1(2-5)	
6	WEATHERING OF ROCKS:	<ul style="list-style-type: none"> <li>• Effects over different properties of rocks</li> <li>• Importance of weathering</li> <li>• Weathering of common rock like granite.</li> </ul>	L7,L8	T1-Ch2(14-26)	
7	Activity		L9		
<b>Unit 2-Mineralogy and Petrology</b>					

S. No	Topics as per the JNTU syllabus		Lecture No.	Suggested Books – Page No.s.	Remarks
	Modules	Sub-Modules			
8	Definition of Mineral	<ul style="list-style-type: none"> <li>• Introduction</li> <li>• Exception for definition of mineral</li> </ul>	L10	T1-Ch3(39-40)	
9	Importance of study of minerals	<ul style="list-style-type: none"> <li>• Relationship between properties of minerals and rocks</li> </ul>	L11	T1-Ch3(39-40)	
10	Different methods of study of minerals	<ul style="list-style-type: none"> <li>• physical properties</li> <li>• chemical composition</li> <li>• optical properties</li> <li>• X-ray analysis</li> </ul>	L12	T1-Ch3(45)	
11	Advantages of study of minerals by physical properties,	<ul style="list-style-type: none"> <li>• Advantages</li> <li>• Disadvantages</li> </ul>	L13	T1-Ch3(46-47)	
12	Role of study of physical properties of minerals in the identification of minerals,	<ul style="list-style-type: none"> <li>• Form</li> <li>• Colour</li> <li>• Streak</li> <li>• Lustre</li> <li>• Fracture</li> <li>• Cleavage</li> <li>• Hardness</li> <li>• Density</li> <li>• Diaphaneity</li> </ul>	L14	T1-Ch3(48-59)	
13	Study of physical properties of common rock forming minerals:	<ul style="list-style-type: none"> <li>• Feldspar,</li> <li>• Quartz,</li> <li>• Flint,</li> <li>• Jasper,</li> <li>• Olivine,</li> <li>• Augite,</li> <li>• Hornblende,</li> </ul>	L15,L16	T1-Ch4(89-93)	
14	Study of physical properties of common rock forming minerals	<ul style="list-style-type: none"> <li>• Muscovite,</li> <li>• Biotite,</li> <li>• Asbestos,</li> <li>• Chlorite,</li> <li>• Kyanite,</li> <li>• Garnet,</li> <li>• Talc</li> <li>• Calcite</li> </ul>	L17,L18	T1-Ch4(89-93)	

S. No	Topics as per the JNTU syllabus		Lecture No.	Suggested Books – Page No.s.	Remarks
	Modules	Sub-Modules			
15	Study of common economic minerals	<ul style="list-style-type: none"> <li>pyrite,</li> <li>Haematite,</li> <li>Magnetite,</li> <li>Bauxite</li> <li>Chromite,</li> <li>Galena,</li> <li>Pyrolusite,</li> <li>Graphite,</li> <li>Magnesite</li> </ul>	L19,L20	T1-Ch4(89-93)	
16	Definition of Rock,	<ul style="list-style-type: none"> <li>Aggregate of Minerals</li> <li>Unit of earth's crust</li> </ul>	L21	T1-Ch5(95-100)	
17	Geological classification of rocks into igneous, sedimentary and metamorphic rocks	<ul style="list-style-type: none"> <li>Formation of Igneous rocks</li> <li>Formation of Sedimentary rocks</li> <li>Formation of Metamorphic rocks</li> </ul>	L22	T1-Ch5(96-100)	
18	Dykes and Sills	<ul style="list-style-type: none"> <li>Forms of intrusive igneous rocks</li> <li>Importance of dykes and sills from civil engineering point of view</li> </ul>	L23	T1-Ch6(104-106)	
19	Common structures and textures of igneous rocks and their distinguishing features	<p><b>Structures</b></p> <ul style="list-style-type: none"> <li>Vesicular</li> <li>Amygdaloidal</li> <li>Columnar</li> <li>Sheet</li> <li>Pillow</li> <li>Flow</li> </ul> <p><b>Textures</b></p> <ul style="list-style-type: none"> <li>Based on degree of crystallinity</li> <li>Based on granularity</li> <li>Shapes of crystals</li> <li>Mutual relations of constituent minerals of rock</li> </ul>	L24,L25	T1-Ch6(115-123)	

S. No	Topics as per the JNTU syllabus		Lecture No.	Suggested Books – Page No.s.	Remarks
	Modules	Sub-Modules			
20	Common structures and textures of sedimentary rocks and their distinguishing features	<ul style="list-style-type: none"> <li>• Stratification</li> <li>• Cementing material</li> <li>• Fossil occurrence</li> <li>• Ripple marks</li> <li>• Mud cracks or Sun cracks</li> <li>• Rain prints or Rain Marks</li> <li>• Tracks and Trails</li> </ul>	L26	T1-Ch7(145-150)	
21	Common structures and textures of metamorphic rocks and their distinguishing features	<p><b>Textures</b></p> <ul style="list-style-type: none"> <li>• Crystalloblastic and palimpsest Textures</li> <li>• Xeoblastic and Idioblastic textures</li> </ul> <p><b>Structures</b></p> <ul style="list-style-type: none"> <li>• Gneissose</li> <li>• Schistose</li> <li>• Granulose</li> <li>• Cataclastic</li> </ul>	L27,L28	T1-Ch8(171-175)	
22	Megascopic and microscopic study of igneous rocks	<ul style="list-style-type: none"> <li>• Granite,</li> <li>• Dolerite,</li> <li>• Basalt,</li> <li>• Pegmatite,</li> </ul>	L29	T1-Ch6(125-133)	
23	Megascopic and microscopic study of Sedimentary rocks	<ul style="list-style-type: none"> <li>• Laterite,</li> <li>• Conglomerate,</li> <li>• sandstone,</li> <li>• shale,</li> <li>• Limestone,</li> </ul>	L30	T1-Ch7(150-160)	
24	Megascopic and microscopic study of Metamorphic rocks	<ul style="list-style-type: none"> <li>• Gneiss,</li> <li>• Schist,</li> <li>• Quartzite,</li> <li>• Marble and</li> <li>• slate</li> </ul>	L31	T1-Ch8(176-183)	
25	Rock excavation	<ul style="list-style-type: none"> <li>• Crushed zone</li> <li>• Crack formation</li> <li>• Crack propagation</li> <li>• Ripping</li> </ul>	L32	R4-Ch9(454-460)	
26	Stone aggregates	<ul style="list-style-type: none"> <li>• Rubble stone</li> <li>• Dimension stone</li> <li>• Flag stone</li> <li>• Crushed stone</li> </ul>	L33	T1-Ch17(371-75)	
27	Activity		L34		

S. No	Topics as per the JNTU syllabus		Lecture No.	Suggested Books – Page No.s.	Remarks
	Modules	Sub-Modules			
<b>Unit-3-Stratigraphy,Ground water, Earthquakes and Landslides</b>					
28	Indian stratigraphy	<ul style="list-style-type: none"> <li>• Principle of stratigraphy</li> <li>• Present is key to past</li> <li>• Aims of stratigraphy</li> <li>• Geological divisions of India</li> </ul>	L35	T1-Ch12(268-284)	
29	Palaentology and geological time scale	<ul style="list-style-type: none"> <li>• Achaean Era</li> <li>• Precambrian Era</li> <li>• Primary</li> <li>• Secondary Era</li> <li>• Tertiary Era</li> <li>• Quaternary Era</li> </ul>	L36	T1-Ch12(264-266)	
30	Outcrop	<ul style="list-style-type: none"> <li>• Inclined bed</li> <li>• Surface slope and dip towards the same side</li> <li>• Surface slope and dip in opposite direction</li> </ul>	L37	T1-Ch9(192)	
31	strike and Dip	<ul style="list-style-type: none"> <li>• True dip</li> <li>• Apparent dip</li> <li>• clinometer</li> </ul>	L38	T1-Ch9(194-195)	
32	Study of common geological structures associating with rocks such as folds and faults, - their important types.	<ul style="list-style-type: none"> <li>• Part of fold</li> <li>• Classification of folds</li> <li>• Parts of fault</li> <li>• Classification of faults</li> </ul>	L39	T1-Ch9(195-218)	
33	Study of common geological structures associating with rocks joints and unconformities- their important types.	<ul style="list-style-type: none"> <li>• Part of Joint</li> <li>• Classification of joint</li> <li>• Parts of unconformities</li> <li>• Classification of unconformities</li> </ul>	L40	T1-Ch9(219-226)	
34	Importance of study of Ground water, Water table common types of ground water, springs	<ul style="list-style-type: none"> <li>• Advantages of using groundwater</li> <li>• Zone of aeration</li> <li>• Zone of saturation</li> </ul>	L41	T1-Ch11(250-253)	

S. No	Topics as per the JNTU syllabus		Lecture No.	Suggested Books – Page No.s.	Remarks
	Modules	Sub-Modules			
35	cone of depression	<ul style="list-style-type: none"> <li>• Unconfined Aquifer,</li> <li>• Drawdown curve</li> <li>• Radius of influence</li> </ul>	L42	T1-Ch11(254-256)	
36	geological controls of ground water movement	<ul style="list-style-type: none"> <li>• Permeability character</li> <li>• Attitude of bedding</li> <li>• Buried river channels</li> <li>• Occurrence of dykes</li> </ul>	L43	T1-Ch11(253-254)	
37	ground water exploration	<ul style="list-style-type: none"> <li>• Water divining</li> <li>• Geological investigation</li> <li>• Geophysical investigation</li> <li>• Hydrological investigation</li> </ul>	L44	T1-Ch11(257-260)	
38	Importance of study of earthquakes ,Their causes and effects	<ul style="list-style-type: none"> <li>• Earthquake terminology</li> <li>• Classification and causes of earthquakes.</li> </ul>	L45	T1-Ch13(286-87,294-95)	
39	shield areas and seismic belts	<ul style="list-style-type: none"> <li>• Occurrence of earthquake due to underground instability</li> <li>• Circum pacific belt</li> <li>• Mediterranean belt</li> <li>• Mid-atlantic ridge</li> </ul>	L46	T1-Ch13(288)	
40	Seismic waves, Richter scale,	<ul style="list-style-type: none"> <li>• P waves</li> <li>• Swaves</li> <li>• L waves</li> <li>• seismograph</li> </ul>	L47	T1-Ch13(289-292)	
41	precautions to be taken for building construction in seismic areas,	<ul style="list-style-type: none"> <li>• foundation on hard bed rock</li> <li>• proper tie-up of super structure and foundation</li> <li>• minimum doors and windows</li> </ul>	L48	T1-Ch13(296)	
42	Landslides	<ul style="list-style-type: none"> <li>• Causes of landslides</li> <li>• Effects of landslides</li> <li>• Preventive measures for landslides</li> </ul>	L49	T1-Ch13(303-307)	

**Unit-4-Dams,Reservoirs,Geophysical Investigations**

S. No	Topics as per the JNTU syllabus		Lecture No.	Suggested Books – Page No.s.	Remarks
	Modules	Sub-Modules			
43	Types of dams	<ul style="list-style-type: none"> <li>• Gravity dams</li> <li>• Arch dams</li> <li>• Buttress dams</li> <li>• Earth/rock fill dam</li> </ul>	L50	T1-Ch18(381-383)	
44	Bearing of Geology of site in their selection, Geological considerations in selection of a dam site	<ul style="list-style-type: none"> <li>• Narrow river valley</li> <li>• Occurrence of bedrock at shallow depth</li> <li>• Competent rocks to offer a stable foundation</li> <li>• Proper geological structures</li> </ul>	L51	T1-Ch18(383-396)	
45	Analysis of Dam failures of the past	<ul style="list-style-type: none"> <li>• St.Francis dam</li> <li>• Halesbar dam</li> <li>• Kaila dam</li> <li>• Kodaganar dam</li> <li>• Tigra dam</li> </ul>	L52	T1-Ch18(378-380)	
46	Factors contributing to the success of a reservoir	<ul style="list-style-type: none"> <li>• Water tightness</li> <li>• Long life</li> </ul>	L53	T1-Ch19(412)	
47	Geological factors influencing water tightness and life of reservoirs	<ul style="list-style-type: none"> <li>• Buried river channels</li> <li>• Influence of rock types</li> <li>• Influence of geological structures</li> <li>• Influence of water table</li> </ul>	L54	T1-Ch19(413-420)	
48	Geo hazards, ground subsidence	<ul style="list-style-type: none"> <li>• Subsidence due to plastic outflow</li> <li>• Subsidence due to compaction</li> <li>• Subsidence due to collapse</li> </ul>	L55	T1-Ch13(303)	
49	Importance of geophysical studies	<ul style="list-style-type: none"> <li>• Exploration geophysics</li> <li>• Necessity of geophysical investigations</li> </ul>	L56	T1-Ch15(308-310)	

S. No	Topics as per the JNTU syllabus		Lecture No.	Suggested Books – Page No.s.	Remarks
	Modules	Sub-Modules			
50	Principles of geophysical study by Gravity methods, Magnetic methods,	<ul style="list-style-type: none"> <li>Physical property</li> <li>Principle</li> <li>Parameters</li> <li>Methods</li> <li>Equipment</li> <li>applications</li> </ul>	L57	T1-Ch15(314-319)	
51	Principles of geophysical study by Electrical methods, Seismic methods,	<ul style="list-style-type: none"> <li>Physical property</li> <li>Principle</li> <li>Parameters</li> <li>Methods</li> <li>Equipment</li> <li>applications</li> </ul>	L58	T1-Ch15(319-327)	
52	Principles of geophysical study by Radiometric methods and Geothermal method,	<ul style="list-style-type: none"> <li>Physical property</li> <li>Principle</li> <li>Parameters</li> <li>Methods</li> <li>Equipment</li> <li>applications</li> </ul>	L59	T1-Ch15(327-330)	
53	Special importance of Electrical resistivity method and seismic refraction method	<ul style="list-style-type: none"> <li>Profiling</li> <li>Sounding</li> <li>Travel-time curve</li> <li>Geophone</li> </ul>	L60	T1-Ch16(332-355)	
54	Improvement of competence of sites by grouting	<ul style="list-style-type: none"> <li>Injection of slurry</li> <li>Spacing of grouting holes</li> </ul>	L61	T1-Ch17(361-362)	
55	Fundamental aspects of Rock mechanics	<ul style="list-style-type: none"> <li>Engineering properties of rocks</li> <li>Study of behavior of rocks under loading</li> </ul>	L62	T1-Ch17(356-357)	
56	Environmental geology	<ul style="list-style-type: none"> <li>Hydrogeology</li> <li>Mineral resources</li> <li>Contamination</li> <li>Open cast workings</li> <li>Flood plain hazard</li> </ul>	L63	R4-Ch7(367-368)	
57	Activity	Quiz	L64		

**Unit 5 :Tunnels**

S. No	Topics as per the JNTU syllabus		Lecture No.	Suggested Books – Page No.s.	Remarks
	Modules	Sub-Modules			
58	Purposes of Tunneling	<ul style="list-style-type: none"> <li>Traffic tunnels</li> <li>Diversion tunnels</li> <li>Pressure tunnels</li> <li>Discharge tunnels</li> </ul>	L65	T1-Ch20(428)	
59	Effects of tunneling on the ground	<ul style="list-style-type: none"> <li>Reduction of cohesiveness and compactness of ground</li> <li>Popping</li> <li>Disturbance of equilibrium</li> <li>Release of poisonous gases</li> </ul>	L66	T1-Ch20(429)	
60	Role of geological considerations (lithological, structural and ground water) in tunneling	<ul style="list-style-type: none"> <li>Importance of rock types</li> <li>Importance of geological structures</li> <li>Importance of groundwater conditions</li> </ul>	L67	T1-Ch20(430-439)	
61	over break and lining in tunnels	<ul style="list-style-type: none"> <li>Provision of support for tunnel</li> <li>Lining, expensive treatment</li> <li>Removal of rocks outside proposed tunnel perimeter</li> </ul>	L68	T1-Ch20(429,440-41)	
62	Subsidence over old mines	<ul style="list-style-type: none"> <li>Subsidence effect of mineral extraction</li> <li>Pillar and stall method</li> </ul>	L69	R4-Ch8(437-443)	
63	Mining substances	<ul style="list-style-type: none"> <li>Cyanide</li> <li>Sulphuric acid</li> </ul>	L70	R5-Ch21(485-86)	

**TEXT BOOKS:**

1. Engineering Geology by N. Chennakesavulu, Mac-Millan, Publishers 2nd Edition India Ltd. 2010.
2. Principles of Engineering Geology by K.V.G.K Gokhale - B.S. Publications
3. Engineering Geology by SubinoyGangopadhyay, Oxford University press.

**REFERENCES:**

**Building Materials, Construction And Planning Session Plan**

S.No	Topics as per JNTU syllabus		Lecture no	Suggested books- pg no	Remarks
	modules	Sub modules			
	<b>Construction Materials</b>	Overview of different construction materials	L1	T3-Ch5(5.1)	
<b>1. Stones, Bricks, wood, Aluminium and Glass</b>					
<b>1</b>	<b>Stones</b>	Introduction	L2	R1-Ch3(67)	
		Importance of stone and uses	L3	R1-Ch3(79-81)	
		Dressing of stone			
		Structural requirements of stone, seasoning of stone	L4	R1-Ch3(81-84)	
	<b>ROCKS</b>	definition	L5	R1-Ch3(67)	
		Rock cycle		R1Ch3(73)	
Classification			R1-Ch3(69,73-75)		
<b>2</b>	<b>Rock forming minerals</b>	Properties	L6	R1-Ch3(68-72)	
		Table of chemical composition and physical characteristics			
<b>3</b>	<b>Quarrying</b>	Definition	L7	R1-Ch3(75-79)	
		Tools used for Quarrying			
		Methods			
<b>4</b>	<b>Bricks</b>	Introduction	L8	R1-Ch2(21,26-28)	
		Manufacturing of clay bricks			
		Composition of Brick earth	L9	R1-Ch2(25-26)	
		Structural requirements	L10	R1-Ch2(35)	
<b>5</b>	<b>Wood</b>	Structure, Types and Properties	L11	R1-Ch4(108-114)	
		Seasoning, Methods of seasoning Defects	L12	R1-Ch4(114-126)	
<b>6</b>	<b>Glass</b>	GI/fiber reinforced glass bricks	L13	T3-Ch5(5.37-5.39)	

S.No	Topics as per JNTU syllabus		Lecture no	Suggested books- pg no	Remarks
	modules	Sub modules			
7	Steel	Steel and Aluminium			
	Activity 1	Pass the chalk	L14,L15		Group 1
					Group 2
<b>2. Cement and Admixtures</b>					
8	Cement	Ingredients of cement	L16	R1- Ch5(167-169),R1-Ch5(173)	
		Manufacture of cement			
		Chemical composition	L17	R1- Ch5(170-171)	
		Hydration			
		Field and lab tests	L18	R1-Ch5(175-186)	
9	Admixtures	Definition	L19	R1 -Ch10(296-300)	
		Mineral and chemical admixtures	L20	R6-Ch5(124-217)	
		Uses			
	Activity 2	Quiz session	L21,L22		Group 1
					Group 2
<b>3. Building components and services</b>					
10	Lintels	Introduction	L23	T1-Ch13(293-295)	
		Classification of lintels			
		Reinforced cement concrete lintels	L24	T1-Ch13(295-296)	
		Loading on lintels			
11	Arches	Stability of an Arch	L25	T1-Ch13(301-305)	
		Classification of an arch			
		Concrete Arches	L26	T1-Ch13(306-307)	
		Construction of Arches			
12	Stair cases	Introduction	L34	T1-Ch14(311-312)	
		Requirements	L35,L36	T1-Ch14(312-320)	
		Classification			
13	Roofs, Foundations	Introduction,Types	L37,L38	T1-Ch15(329-336)	
14	Joinery	Introduction	L39	T1-Ch17(363-370)	
		Classification			
		Doors	L40	T1-Ch17(377-397)	
		Windows			

S.No	Topics as per JNTU syllabus		Lecture no	Suggested books- pg no	Remarks
	modules	Sub modules			
15	Plumbing services	Water distribution	L41	T1-Ch30(585-595)	
		Sanitary:lines and fittings			
16	Ventilations	Air-conditioning Essentials and types	L42	T1-Ch27(519-529)	
17	Acoustic	Characteristics Absorption	L43	T1-Ch28(533-544)	
		Acoustic design			
18	Fire protection	Fire Hazards	L44	T1-Ch23(459-466)	
		Classification of fire			
		resistant materials Construction			
	Activity 3	Group discussion	L45,L46		Group 1
					Group 2
<b>4. Masonry and Finishing</b>					
19	Masonry	Brick masonry	L47	T1-Ch6(167-169)	
		Types-bonds	L48	T1-Ch6(171-179)	
		Stone masonry types	L49	T1-Ch5(139)	
		Composite masonry	L50	T1-Ch7(215-220)	
20	Finishers	Plastering,pointing Painting,cladding	L51,L52	T1-Ch19(421-430)	
		Tiles-Types			
21	Form work	Requirements	L53	T1-Ch18(411-414)	
		Standards			
		Design,shoring			
		Underpinning Scaffolding	L54	T1-Ch18(415-416)	
	Activity 4	Poster presentation	L55,L56		Group 1
					Group 2
<b>5. Building Planning</b>					
22	Building Planning	Introduction	L57	T1-Ch31(605-606)	
		Types of plans			
		Principles of building planning	L58	T3-Ch3(3.2-3.13)	
		Classification of the buildings			
		By-laws			
	Activity 5	Jam session	L59,L60		Group 1

S.No	Topics as per JNTU syllabus		Lecture no	Suggested books- pg no	Remarks
	modules	Sub modules			
					Group 2

### TEXT BOOKS:

1. Building Construction by B.C.Punmia, Ashok Kumar Jain and Arun Kumar Jain - Laxmi Publications (P) ltd., New Delhi
2. Building Construction by PC Verghese PHI.
3. Building Materials and Construction - Arora&Bindra, Dhanpat Roy Publications.

### REFERENCES:

1. Building Materials by Duggal, New Age International.
2. Building planning by G.C.Singh.
3. Construction Technology- Vol- I& II by R. Chuddy, Longman UK.
4. Basics of Civil Engg by SubhashChander; Jain Brothers.
5. Alternate Building materials and Technology, K.S.Jagadish, Venkatarama Reddy and others; New Age Publications.
6. Concrete technology by M.S.Shetty, S.chand publications

62	Protection	System Protection Goals of protection Principles of protection	L57	T1-Ch17 (595-597) R1-Ch18 (592-596) T2-Ch15 (653) R4-Ch8 (347-343) R5-Ch14 (415-420)	
63	Domain of protection Access matrix	Introduction An example Implementation of access matrix	L58	T1-Ch17 (597-609) T2-Ch15 (653-656) R3-Ch9 (645-646) R4-Ch8 (343-348), (353-355) R5-Ch14(421-425)	
64	Access Control	Access control Revocation of access rights	L59	T1-Ch17 (609-613) T2-Ch15 (663-664)	
65	Capability based systems	An example	L60	R3-Ch9 (647-649) R4-Ch8 (345-347)	
66	Language based protection	Compiler based enforcement Protection in java		T1-Ch17 (614-619)	

### SUGGESTED BOOKS

#### Text Books:

1. Operating System Principles, Abraham Silberschatz, Peter Baer Galvin, Greg Gagne, \*th edition, Wiley Student Edition.
2. Operating Systems – Internals and Design Principles, W.Stallings, 6<sup>th</sup> Edition, Pearson.

#### Reference Books:

1. Modern Operating Systems, Andrew S Tanenbaum, 3<sup>rd</sup> edition, PHI.
2. Operating Systems: A concept based approach, 2<sup>nd</sup> edition, D.M. Dhamdhere, TMH.
3. Principles of operating systems, B.L.Stuart, Cengage learning, India.
4. Operating Systems, A.S. Godbole, 2<sup>nd</sup> edition, TMH.
5. An Introduction to Operating Systems, P.C.P Bhatt, PHI.
6. Operating systems, S.Haldar and A.A.Aravind, Pearson Education.
7. Operating Systems, R.Elmasri, A.G. Carrick and D.Levine, Mc Graw Hill
8. Operating Systems in depth, T.W.Doeppner, Wiley.

**Semester – II (2016-17)**

**WT Session Plan**

S. No.	Topics as per the JNTU Syllabus	Sub-Topics	Lecture No.	Suggested Books	Remarks
1	Overview of subject	Overview of PHP,HTML, XML, JSP , Web servers , Servlets, JDBC	L1	T1, T2, R1	
2	Necessary Background	Internet, www, Web server, browsers, Mark-up languages			
<b>UNIT-I : INTRODUCTION TO PHP</b>					
3	Declaring variables, data types	Php variables scope, data types	L1	T1	
4	Arrays	Indexed arrays Associative arrays Multidimensional arrays	L2	T1	
5	Strings	Reverse a String Count The Number of Words in a String String Concatenation Operator	L3	T1	
6	operators, expressions	Operators, expressions	L4	T1	
7	control structures, functions	Statements ,php functions	L5	T1	
8	data from web form controls like text boxes, radio buttons, lists etc.,	Text boxes, radio buttons,lists	L6	T1	
9	Handling File Uploads	Handling File Uploads	L7	T1	
10	Connecting to database (MySQL as reference)	Connecting to MySql	L8	T1	
11	executing simple queries, handling results	executing simple queries, handling results	L9	T1	
12	Handling sessions and cookies File Handling in PHP	sessions and cookies File Handling i	L10	T1	
13	File operations	opening, closing, reading, writing, appending, deleting etc. on text files	L11	T1	
14	File operations like opening, closing, reading, writing, appending, deleting etc. on binary files	File operations like opening, closing, reading, writing, appending, deleting etc. on binary files	L12	T1	
<b>UNIT-II : XML</b>					
15	Introduction to XML	Introduction to XML Documents, well-formed, Structuring Data XML Namespaces	L 13	R1-Ch20 (684-695),	

S. No.	Topics as per the JNTU Syllabus	Sub-Topics	Lecture No.	Suggested Books	Remarks
16	Document Type Definition	DTDs, validating a document, Internal and external DTDs Example programs	L 14	T2 R3-Ch20 (686),	
17	XML Schemas	Introduction to XML Schema, Architecture of XML Schema, parsers, example	L 15, L16	T2 R1-Ch20 (697)	
18	DTD	Dynamic HTML, XML-DTD, Schemas	L 17	T2	
19	Document Object Model	Structure of DOM,DOM Methods, example	L 18	T2 R1-Ch20 (712-731)	
20	Presenting XML	XML Presentation, advantages of XML Presentations	L 19	T2	
21	XML Processors	XML Processor definition,DOM,SAX	L20,L 21	T2 R6-Ch7(320-322)	
<b>UNIT-III : INTRODUCTION TO SERVLETS</b>					
22	Introduction to Servlets	Introduction to Servlets Background of Servlets	L 22	R1-Ch36 (1343-1346)	
		Life cycle of Servlets and Simple Servlet program	L 23 L 24	R1-Ch36 (1343-1346)	
23	Servlet API	javax.servlet package ServletConfig, ServletContext, ServletRequest,GenericServlet class, HTTPServlet class, Interfaces	L 25,26	T2	
24	Protocols	Protocols, Servlets – API, Life cycle	L27	T2	
25	Starting parameters, reading initialisation parameters	Servlet parameters Initializations	L 28	T2	
26	The javax.servlet HTTP Package Handling HTTP request and responses	HTTP GET Request HTTP Post Request	L 29 L 30	T2	
27	Using Cookies Session tracking Security Issues	Session tracking and security Issues	L 31 L 32	R6-Ch11, Ch12	
28	Sessions	Servlet – Initialization – GET, POST, Sessions	L33	R1	
<b>UNIT-IV :INTRODUCTION TO JSP</b>					
29	Introduction to JSP The problem with Servlet	JSP overview disadvantage of Servlet Parts of JSP	L 34	R2-Ch1 (3-27), R2-Ch3 (29)	
30	The Anatomy of JSP page	JSP page, JSP elements, usage of JSP pages	L 35	R2-Ch3 (1382-1422),	

S. No.	Topics as per the JNTU Syllabus	Sub-Topics	Lecture No.	Suggested Books	Remarks
31	JSP Processing	JSP Page translation processing phases Model-view controller Implicit objects, using script lets	L 36	R2-Ch37 (1382-1422),	
32	Declarations Directives	MVC Architecture, Business logic, presentation, application request processing	L37 L38	R4.pg324	
33	Expressions, Code Snippets	Steps to install JDK, Configuring the environment variables		R4.pg99	
34	implicit objects	Installing the Tomcat server , configuring , testing ,Example web application overview	L 39, L40	R1-ch2.0	
35	Using Beans in JSP Pages	Page directives, include, implicit objects Installation - Tomcat	L41	R2-Ch6 (75-97),	
36	Using Cookies and session for session tracking	Using Cookies and session for session tracking	L42	R2-Ch6 (98-101),	
37	Connecting to database in JSP	Connecting to database in JSP	L43	R2-Ch6 (102-105),	
<b>UNIT-V : CLIENT SIDE SCRIPTING</b>					
38	Introduction to Javascript:	Drawbacks of HTML Introduction to script, Declaration of variables, Control statements	L 44 L45	T2-Ch5 (97-146) R1-Ch7 (228-423)	
39	declaring variables, scope of variables,	declaring variables, scope of variables	L46	T2	
40	functions, event handlers (onclick, onsubmit etc.),	onclick, onsubmit etc.	L47, L48	T2-Ch5 (97-146) R1-Ch7 (228-423)	
41	Document Object Model	Document Object Model	L49	T2	
42	Form validation	Form validation	L50	T2	
43	Simple AJAX application.	Simple AJAX application	L51,L 52	T2

<b>SUBJECT INTRODUCTION</b>					
1	Overview	Pre-requisites Text Books/ Reference books and Unit wise overview of the Subject	L1		
<b>UNIT-I: OPERATIONAL AMPLIFIER</b>					
2	Ideal Op Amp & Characteristics	Electrical characteristics of Ideal Op-Amp and its equivalent circuit	L2	T1-Ch2 (49-50) T2-Ch3 (109-110)	
3	Practical Op Amp & Characteristics	Electrical characteristics of practical Op-Amp and its equivalent circuit	L3	T2-Ch3 (109-110) R1-Ch7(328-335)	
4	OP-Amp characteristics, DC Characteristics	Input Bias current, offset voltage, offset current and thermal drift. (only Definitions )	L4	T1-Ch3(117-126) R1-Ch5(225-229)	
5	AC Characteristics	Frequency response, Stability , Frequency compensation, slew rate	L5	T1-Ch3(126-144) R1-Ch8(358-374)	
6	741 OP-AMP and its features	Input resistance, input capacitance, input voltage range, SVRR, output resistance, large signal voltage gain, output voltage swing, output short circuit current, supply current, power consumption, gain bandwidth product, equivalent input noise voltage and current.	L6	T2-Ch3 (91,102- 107) R1-Ch5(249-257)	
7	Modes of operation & Inverting amplifiers	Closed loop gain, i/p and o/p impedances for ideal and practical inverting Amplifier	L7	T1-Ch2 (51-55) T2-Ch3 (112) R1-Ch5(266-268)	
8	Non-inverting amplifiers	Closed loop gain, i/p and o/p impedances for ideal and practical non-inverting Amplifier, voltage follower	L8	T1-Ch2 (56-58) T2-Ch3 (113) R1-Ch5(264-266)	
9	Differential Amplifier	Combination of inverting and Non inverting and its internal blocks	L9	T1-Ch2 (59) T2-Ch3 (114)	

S. No.	Topics as per JNTU Syllabus	Sub-Topics	Lecture No.	Books Suggested Pg Nos.	Remarks
10	Instrumentation amplifier	Transducer circuit connection in industry & different Application	L10	R1-Ch 2(73-79)	GATE, IES
11	AC amplifier, buffers	Inverting, Non-inverting AC amplifier and AC Voltage follower	L11	T1-Ch4(164-166) T2-Ch7(237-244)	
12	Integrator and differentiator	Gain, frequency response of Ideal and practical circuits	L12	T1-Ch4(186-201) T2-Ch7(275-284) R1-Ch3(116-118)	
13	Comparators & Schmitt Trigger	Differential Amplifier & its Application, Comparator with closed loop Hysteresis & Losses	L13	T1-Ch5 (240)	
14	Introduction to Voltage Regulators, features of 723 regulators	723 General Purpose Regulator, 78XX, 79XX, Switching Regulator	L14	T1-Ch6(254-276) R1-Ch5(234-239)	
15	Three terminal Voltage regulators	Positive Regulators 7805, 7812 & Negative Regulators 7905, 7912.etc	L15	T1-Ch6(251-253)	
<b>UNIT-II OP-Amp, IC-555 &amp; IC 565 Applications</b>					
16	Introduction to Active filters	Types of filters, 1 <sup>st</sup> and 2 <sup>nd</sup> order filters, frequency responses of various filters	L16	T1-Ch7 (282-291) T2-Ch8 (290-293) R1-Ch3(106-109)	
17	Band pass filter	Transfer function of 1 <sup>st</sup> and 2 <sup>nd</sup> order BPF,; WBPF, NBPf	L17	T1-Ch7 (301-306) T2-Ch8 (308-313) R1-Ch3(109-114)	
18	Band rejection filters	Transfer function of 1 <sup>st</sup> and 2 <sup>nd</sup> order BRf, WBRf, Notch filter	L18	T1-Ch7 (306-311) T2-Ch8 (313-316) R1-Ch3(109-114)	GATE, IES
19	All pass filter	Transfer function, phase shift, problems	L19	T2-Ch8 (316-318) R1-Ch3(107-108)	
20	Low pass filter	Transfer function of 1 <sup>st</sup> and 2 <sup>nd</sup> order LPF, higher order LPF design	L20	T1-Ch7 (291-299) T2-Ch8 (293-301) R1-Ch3(109-114)	
21	High pass filter	Transfer function of 1 <sup>st</sup> and 2 <sup>nd</sup> order HPF, higher order HPF design	L21	T1-Ch7 (300-301) T2-Ch8 (301-307) R1-Ch3(109-114)	
22	Wave Form Generators	Triangular, Sawtooth waveform and Square Waveform generators	L22	T1-Ch7 (306-311) T2-Ch8 (313-316) R1-Ch3(109-114)	
23	IC 555 Timer, Functional block diagram	Pin diagram, block diagram, working principle	L23	T1-Ch8 (331-332) T2-Ch10 (417-421)	GATE, IES
24	Monostable operation and its applications	circuit diagram & its working principle pulse detector, ramp generator, frequency divider, PWM	L24	T1-Ch8 (332-340) T2-Ch10 (421-425)	

S. No.	Topics as per JNTU Syllabus	Sub-Topics	Lecture No.	Books Suggested Pg Nos.	Remarks
25	Astable operation and its applications, Schmitt trigger	Circuit diagram & its working principle FSK Generator, PPM, square wave oscillator, free running ramp generator	L25	T1-Ch8 (341-350) T2-Ch10 (425-430)	
26	IC 565 PLL block schematic diagram and	Basic principle, block diagram, phase detector, VCO, LPF	L26	T1-Ch9 (353-366) T2-Ch10 (430-437)	
27	PLL Description of individual blocks of 565 & Applications	Pin diagram, block diagram, working principle, lock In range, capture range	L27	T1-Ch9 (367-373) T2-Ch10 (437-441)	
<b>UNIT-III D-A AND A-D CONVERTERS</b>					
28	Introduction, Basic DAC techniques & weighted resistor DAC	Types of converters, Types of DACs, circuit diagram and working principle of weighted resistor DAC	L28	T1- Ch10(382-384) T2- Ch9 (370-372) R1-Ch12(561-568)	GATE, IES
29	R-2R Ladder DAC, Inverted R-2R,	Circuit diagram and working principle of R-2R Ladder and inverted R-2R ladder	L29	T1- Ch10(385-393) T2- Ch9 (372-374) R1-Ch12(570-572)	
30	Types of ADCs, Parallel comparator type ADC	Types of ADCs, Circuit diagram and working principle of parallel comparator type ADC	L30	T1- Ch10(394-396) R1-Ch12(584--594)	
31	Counter type ADC, Successive approximation Register type ADC	Circuit diagram and working principle of counter type ADC and Successive approximation ADC	L31	T1- Ch10(396-400) T2- Ch9 (376-377) R1-Ch12(586-588)	
32	Dual slope ADC	Circuit diagram and working principle of Dual slope ADC	L32	T1- Ch10(401-404) R1-Ch12(593)	
33	Specifications of DAC, ADC	Resolution,, linearity error, accuracy, gain and offset error, monotonicity, settling time, stability	L33	T1- Ch10(404-408) R1-Ch12(561-566)	
<b>UNIT- IV DIGITAL INTEGRATED CIRCUITS</b>					
34	Classification of Integrated Circuits	Digital IC's introduction,	L34	T3- CH1 (11) T3-CH11 (453 to 460) R2- CH1 (1 TO 16)	
35	Comparisons of Various logic families	Based on parameters like Speed Package Density Power consumption Fan-out etc.	L35	T3-Ch11 (487)	
36	CMOS Transmission gates	CMOS Transmission & logic gates construction	L36	T3-Ch11 (488)	

S. No.	Topics as per JNTU Syllabus	Sub-Topics	Lecture No.	Books Suggested Pg Nos.	Remarks
37	IC Interfacing	Interfacing TTL to CMOS	L37	R2-Ch4 (114)	
38	TTL Driving CMOS & CMOS driving CMOS	CMOS with TTL Circuits Interfacing CMOS to TTL	L38	R2-Ch4 (123 to 125)	
39	Combinational Logic IC 74XX and 40XX series Specifications	Use of TTL Logics Study Data sheets 74XX	L39	T3-Ch11 (454 to 491) R2-CH4 (108 to 110)	
40	Code converters	BCD to Seven segment decoder	L40	T3-Ch6 (236 to 238) R2-Ch6 (217 to 225)	
41	Decoders	Binary decoders 74x139 IC 74x138 IC	L41	T3-CH6 (222 to 230) R2-CH6 (196 to 200) R2-CH6 (228 to 232)	
			L42		
42	Encoders	Priority encoders 74x148 IC	L43	T3-Ch6 (231 to 235) R2-Ch6(226 to 228)	
43	Priority encoder	Simple dual priority encoder Dual priority encoder using 74x138 and 74x148s	L44	R2-CH6 (226 to 228)	
44	Multiplexers & Demultiplexers	Standard MSI multiplexers 74xx151 74xx157, Standard MSI demultiplexers	L45	T3-Ch6 (238 to 246) R2-Ch6 (191 to 196) T3-Ch6 (247) R2-Ch6 (196 to 200)	
			L46		
45	Priority generator and checkers	Priority generator and checkers	L47	T3-Ch6 (204 to 208) R2-Ch6(196 to 201)	
46	Parallel Binary Adders and Subtractor	Half adder, Full adder Ripple carry adder Carry look ahead adder 74X283 4-bit binary adder	L48 L49	T3-Ch6 (208 to 217) R2-Ch6(201 to 211)	
		Subtraction using 2's complement system	L50		
47	Magnitude Comparators	Comparator structure, 74x85 and 74x682 ICs	L51	T3-Ch6 (218 to 221) R2-Ch6 (212 to 214)	
<b>UNIT V: SEQUENTIAL CIRCUIT IC'S AND MEMORIES</b>					
48	74XX & CMOS 40XX Series	RS Flip flop, JK Flip flop, JK Flip flop Master-slave Flip flop, D Flip flop, T Flip flop and their conversions	L52	T3-Ch7 (266 to 294) R2-Ch7 (237 to 251)	
			L53		

S. No.	Topics as per JNTU Syllabus	Sub-Topics	Lecture No.	Books Suggested Pg Nos.	Remarks
49	Synchronous	Decade counters, Ripple counters Synchronous counters	L54	T3-Ch8 (304 to 344) R2-Ch7 (273 to 326)	
50	Shift registers	Shift register structure MSI shift registers Serial/ parallel conversion Shift register counters Ring counters, Johnson counters and applications	L56	T3-Ch9 (354 to 381) R2-Ch7 (267 to 272)	
51	Memories- ROM Architecture	ROM Architecture and its internal block explanation	L57	T2-Ch10 (390 to 410)	
52	Types of ROMS & Applications	Different types of ROMs	L58	T2-Ch10 (411 to 413)	
53	RAM Architecture	RAM internal Architecture	L59	T2-Ch10 (420 to 428)	
54	Static & Dynamic RAMs	RAM Classifications	L60	T2-Ch10 (429 to 451)	

#### TEXTBOOKS:

1. Linear Integrated Circuits –D. Roy Chowdhury, New Age International (p) Ltd, 3rd Ed., 2008.
2. Digital Fundamentals – Floyd and Jain, Pearson Education, 8th Edition, 2005.
3. Op-Amps and Linear Integrated Circuits – Concepts and Applications by James M. Fiore, Cengage/ Jaico, 2/e, 2009.

4. Operational Amplifiers with Linear Integrated Circuits, 4/e William D. Stanley, Pearson Education India, 2009.

**Department of Electronics & Communication Engineering**  
**Semester – II (2016-17)**

**Digital Communications Session Plan**

S.No.	Topics as per JNTU Syllabus	Sub-Topics	Lecture No.	Suggested Books	Remarks
1	overview	Subject overview	L1		
2	Necessary Background	Analog communications Signals and systems	L2		
3	Model of Digital Communication systems	Information Source Modulator, Demodulator Decoder, Encoder	L3	T2, Ch1, 1-11 R1, Ch1, 4-11	
<b>UNIT-I ELEMENTS OF DIGITAL COMMUNICATION SYSTEM</b>					
4	Advantages of Digital Communication Systems	Advantages & Disadvantages of Digital Communication Systems	L4	T2, Ch1, 1-11 R1, Ch1, 4-11 R5,ch1,13	
5	Bandwidth-S/N tradeoff	Bandwidth-S/N tradeoff Hartley Shanon Law	L5	T1, Ch7, 522-523 R4, Ch8, 378-381	
6	Hartley Shanon Law & Sampling Theorem	Hartley Shanon Law & Hartley Shanon Law	L6	R2, Ch4. 141-146 R4, Ch1, 89-90	
7	Sampling Theorem	Sampling Theorem	L7	R2, Ch4. 141-146 R4, Ch1, 89-90	
8	PCM Generation and Reconstruction	PCM transmitter & receiver Band width	L8	T1,Ch5,212-226	
9	Quantization noise	Uniform Quantization <ul style="list-style-type: none"> <li>• MIDTREAD</li> <li>• MIDRISER</li> <li>• BIASED</li> <li>• SNR for PCM</li> </ul>	L9	T2, Ch2, 529-549 T1, Ch2, 487-505 R2, Ch5, 172-210	GATE/ IES
10	Non Uniform Quantization and Companding	Necessity of non uniform quantization A-Law companding $\mu$ -Law companding	L10	T1,Ch5,213-219	
11	DPCM	DPCM Example problems	L11	T1,Ch5,226-228	

S.No.	Topics as per JNTU Syllabus	Sub-Topics	Lecture No.	Suggested Books	Remarks
12	Adaptive DPCM	Adaptive DPCM	L12		
13	Delta Modulation	<ul style="list-style-type: none"> <li>Slope overload distortion</li> <li>Granular noise</li> <li>Signal to quantization noise</li> </ul>	L13	T1,Ch5,229-232 T2,Ch10,539-546	
	Adaptive DM	Adaptive Delta Modulation	L14	T1,Ch5,232-236 T2,Ch10,543-54	
14	Noise in PCM and DM	Noise in PCM Noise in DM	L15	T1,Ch12,496-501	

### UNIT-II DIGITAL MODULATION TECHNIQUES

15	Digital modulation techniques	Introduction <ul style="list-style-type: none"> <li>ASK</li> <li>PSK</li> <li>FSK</li> </ul>	L16	T1, Ch6, 249-282 T2, Ch8, 380-412 R2, Ch7, 273-357	GATE/ IES
16	ASK Modulator, Coherent ASK Detector, Non-Coherent ASK Detector	Coherent ASK Detector	L17	T2,Ch8,396-398	
		Non-Coherent ASK Detector	L18	T2,Ch8,398-402	
17	FSK, Bandwidth and Frequency Spectrum of FSK	FSK Transmitter Bandwidth and Frequency Spectrum of FSK	L19	T2,Ch8,408-412	
18	Non coherent FSK Detector, Coherent FSK Detector	Non coherent FSK Detector Coherent FSK Detector	L20	T2,Ch8,412-413	
19	FSK Detection Using PLL	FSK Detection Using PLL Signal space representations		L21	T1,Ch5,282-286
20	BPSK, Coherent PSK Detection	Coherent PSK Detection	L22	T1,Ch5,250-255 T2,Ch8,396-398	
21	QPSK Differential PSK	QPSK Differential PSK	L23	T1,Ch6,259-266	

### UNIT-III BASEBAND TRANSMISSION AND OPTIMAL RECEPTION OF DIGITAL SIGNAL INFORMATION THEORY

22	Pulse shaping for optimum transmissions	Ideal Nyquist Raised cosine spectrum	L24	T2, Ch5, 189-193 R2, Ch6, 234-267	GATE/ IES
----	---	---	-----	--------------------------------------	--------------

S.No.	Topics as per JNTU Syllabus	Sub-Topics	Lecture No.	Suggested Books	Remarks
23	A Baseband Signal Receiver, Probability of Error	A Baseband Signal Receiver, Probability of Error,	L25	T2, Ch5,193-196	
24	Optimum Receiver	Probability of Error, Transfer function	L26	T2, Ch5,197-201	
25	Optimal of Coherent Reception Signal Space Representation and Probability of Error	Probability of Error for ASK FSK PSK QPSK	L27 L28	T2, Ch8,3855-415	
26	Eye Diagrams, Cross talk	Eye Diagrams • ASK • PSK • FSK Cross talk	L29	T2,Ch5,237-240	
27	Information and entropy	Information Properties of entropy	L30	T1, Ch1, 511-527 T2, Ch3, 138-157	GATE/ IES
28	Conditional Entropy and redundancy	Joint entropy Conditional Entropy	L31	R2, Ch2, 13-51	
29	Shannon Fano coding	Shannon Fano coding Example	L32	T2,Ch4,155-162	
30	Mutual Information Information loss due to noise	Mutual Information Properties	L33	R5,ch14,716-720	
31	Source codings- Huffman Code	Huffman Code Example	L34,35	R5,ch14,735-738	
32	Variable length coding	Variable length coding	L36	R5,ch14,728-734	
33	Source coding to increase average information per bit	Source coding to increase average information per bit	L37	R5,ch14,728-734	
34	Lossy source coding	MPEG JPEG	L38	R1,ch6,323-327	
<b>UNIT-IV ERROR CONTROL CODES</b>					
35	Matrix description of Linear Block Codes	Linear Block Codes Matrix description of LBC	L39	T2, Ch9, 449-450 R5,Ch15,754-760	GATE/ IES

S.No.	Topics as per JNTU Syllabus	Sub-Topics	Lecture No.	Suggested Books	Remarks
36	Error detection and error Correction capabilities of linear block cods	Error detection and error Correction capabilities of linear block cods	L40	T2, Ch9, 450-454 R5,Ch15,760-763	
37	Cyclic Codes	Algebraic Structure Encoding, Syndrome Calculation, Decoding	L41,42	T2, Ch9, 461-471 R5,Ch15,763-772	
38	Convolution Codes Encoding,	Convolution Codes Encoding,	L43	T2, Ch1, 478-486 R5,Ch15,789-794	GATE/ IES
39	Decoding Using State Tree and trellis diagrams	Decoding Using State Tree Trellis diagrams	L44		
40	Decoding using Viterbi algorithm	Decoding using Viterbi algorithm	L45,L46	R5,Ch15,783-789	
41	Comparison of Error Rates in Coded and Uncoded Transmission	Comparison of Error Rates in Coded and Uncoded Transmission	L47	T2, Ch1, 478-496	
42	Problems	Problems on error control codes	L48		
<b>UNIT-V SPREAD SPECTRUM MODULATION</b>					
43	Introduction & Use of Spread Spectrum	Introduction & Use of Spread Spectrum	L49	T1, Ch16,738-75 R5,Ch17,856-859	
44	Direct Sequence Spread Spectrum (DSSS)	Effect of thermal noise Single tone interference	L50	T1, Ch16,721-729	
			L51		
45	Code Division Multiple Access	Code Division Multiple Access	L52	T1, Ch16,726-727	GATE/ IES
46	Ranging using DSSS	Ranging using DSSS	L53	R5,Ch15,868-869	
47	Frequency Hopping Spread Spectrum	Need for coding Near far problem Detection of FH/BFSK signal	L54	R5,Ch15,858 T2,Ch16,729-732	
48	PN-Sequences:	Generation Characteristics	L55	R5,Ch15,860-863, T2,Ch16,733-739	
			L56		
49	Synchronization in Spread Spectrum Systems	Acquisition DS & FH Tracking	L57	R5,Ch15,866-868 T2,Ch16,745-748	

## **TEXT BOOKS:**

1. Principles of communication systems – Herbert Taub, Donald L Schiling, Goutam Saha, 3<sup>rd</sup> Edition, McGrah-Hill, 2008
2. Digital and Analog Communication Systems – Sam Shanmugam, John Wiley, 2005

**Department of Electrical & Electronics Engineering**  
**Semester – I (2016-17)**

**Session Plan**

Subject Name: POWER SYSTEM OPERATION & CONTROL

Class & Year : IV Year EEE Sem-I

Name of the faculty : P.Yellaiah

Topics in each unit as per JNTU syllabus	Modules / Sub-modules for each topic	Lecture No.	Text books / Reference Books	Remarks
Overview	Power system operation & control deals with economic operation of power systems, hydrothermal scheduling, optimal power flow solution, load frequency control & reactive power control	L-1		
Applications and Extensions	It emphasizes on single area and two area load frequency control and reactive power control.	L-2		
Necessary Background	This course is an extension of power system-II	L-3		
<b>UNIT-I</b>				
Optimal operation & generators thermal power stations	Introduction to optimal operation and applications Different generating plants and differences	L-4	<b>T1:</b> 7.1 <b>R4:</b> 1.1	<b>GATE/IES</b>
Heat rate curve	Heat rate equation and importance of it	L-5	<b>T1:</b> 7.2 <b>R4:</b> 1.2	
Cost curve	Cost rate equation and importance	L-6	<b>T1:</b> 7.3 <b>R4:</b> 1.3	
Incremental fuel cost	Different types of incremental costs an importance	L-7	<b>T1:</b> 7.4 <b>R4:</b> 1.4 <b>T1:</b> 7.4 <b>R4:</b> 1.4	
Incremental production cost		L-8	<b>T1:</b> 7.5 <b>R4:</b> 1.5	
Incremental	Incremental production cost	L-9	<b>T1:</b> 7.5	<b>GATE/IES</b>

production cost			<b>R4:</b> 1.5	
Input output characterizations		L-10	<b>T1:</b> 7.6 <b>R4:</b> 1.6	
Optimum generation allocation with transmission line losses	Generation optimal conditions with losses and without	L-11	<b>T1:</b> 7.7 <b>R4:</b> 1.7	
Optimum generation allocation with transmission line losses		L-12	<b>T1:</b> 7.7 <b>R4:</b> 1.7	
Without losses			<b>T1:</b> 7.8 <b>R4:</b> 1.8	
Loss coefficients	Calculations for Loss coefficients	L-13	<b>T1:</b> 7.9 <b>R4:</b> 1.9	
Transmission line loss formula	Derivation and explanation	L-14	<b>T1:</b> 7.10 <b>R4:</b> 1.10	
TUTORIAL	problems	L-15	<b>T1:</b> Ch7 <b>R4:</b> Ch1	
<b>UNIT-II</b>				
Introduction to power systems	Introduction	L-16	<b>T1:</b> 7.11 <b>R4:</b> 1.11	<b>GATE/IES</b>
Optimal scheduling of Hydrothermal System..	Optimal scheduling Hydrothermal System..	L17	<b>T1:</b> 7.12 <b>R4:</b> 1.12	
Hydroelectric Power plant models.	Hydroelectric Power plant models.	L-18	<b>T1:</b> 7.13 <b>R4:</b> 1.13	
Scheduling problems	Scheduling problems	L-19	<b>T1:</b> Ch7 <b>R4:</b> Ch1	
Shorter Hydrothermal scheduling problem		L-20	<b>T1:</b> Ch7 <b>R4:</b> Ch1	
TUTORIAL		L-21		
<b>UNIT-III</b>				
Block Diagram	Block Diagram importance	L-22	<b>T1:</b> 7.11 <b>R4:</b> 1.11	
Synchronous machine modeling	Introduction to Synchronous machine Modeling	L-23	<b>T1:</b> 7.12 <b>R4:</b> 1.12	
Swing equation State space model of	Swing equation State space model of	L-24	<b>T1:</b> 7.13 <b>R4:</b> 1.13	

synchronous machine	synchronous machine			<b>GATE/IES</b>
Mathematical modeling	Mathematical modeling	L-25	<b>T1:</b> Ch7 <b>R4:</b> Ch1	
Derivation of Transfer function	Derivation of Transfer function	L-26	<b>T1:</b> Ch7 <b>R4:</b> Ch1	
Fundamental Characteristics	Fundamental Characteristics	L-27	<b>T1:</b> 7.11 <b>R4:</b> 1.11	
Transfer function	Transfer function	L-28	<b>T1:</b> 7.12 <b>R4:</b> 1.12	
IEEE type one model	Block Diagram Representation	L-29	<b>T1:</b> 7.13 <b>R4:</b> 1.13	
<b>UNIT-IV</b>				
Necessity of keeping frequency constant	frequency constant and variation in power systems	L-30	<b>T1:</b> 8.1	<b>GATE/IES</b>
Definitions of control area	Definitions of control area	L-31	<b>T1:</b> 8.2	
Single area control	Single area control	L-32	<b>T1:</b> 8.3	
Block diagram of PS	Block diagram of PS	L-33	<b>T1:</b> 8.4	
Study state analysis	Study state analysis	L-34	<b>T1:</b> 8.4	
Dynamic response	Dynamic response	L-35	<b>T1:</b> 8.5	
Uncontrolled case	Uncontrolled case	L-36	<b>T1:</b> 8.6	
TUTORIAL	problems	L-37	<b>T1:</b> 8.1	
2 area system	2 area system	L-38	<b>T1:</b> 8.6	
Load frequency control of 2 area system	Load frequency control of 2 area system	L-39	<b>T1:</b> 8.7	
Uncontrolled	Uncontrolled	L-40	<b>T1:</b> 8.8	
Controlled case	Controlled case	L-41	<b>T1:</b> 8.9	
Tie line bias control	Tie line bias control	L-42 L-43	<b>T1:</b> 8.10	
Tutorial	Problems	L-44		
P+I control block single area	Importance of P and I and D controllers	L-45	<b>T1:</b> 8.11	<b>GATE/IES</b>
P+I control block diagram	P+I control block diagram	L-46	<b>T1:</b> 8.11	
Study state response	Steady state response	L-47	<b>T1:</b> 8.12	
Load frequency control	Load frequency control	L-48	<b>T1:</b> 8.13	
Economic dispatch control	Economic dispatch control	L-49	<b>T1:</b> 8.14	
TUTORIAL	Problems	L-50		

UNIT-V			
Over view	Over view of compensations	L-51	
RPC in transmission system	RPC in transmission system	L-52	<b>T3: 3.2</b>
Compensation in transmission systems	Compensation in transmission systems	L-53	<b>T3: 1.3</b>
Types of compensating equipment in transmission lines	Types of compensating equipment in transmission lines	L-54	<b>T3: 3.3</b>
Advantages Disadvantages	Advantages Disadvantages	L-55	<b>T3: 3.4</b> <b>R3: 3.5</b>
Load compensation	Load compensation	L-56	<b>R2: 2.1</b>
Specifications	Specifications	L-57	<b>T3: 2.2</b>
Uncompensated of Compensated transmission lines	Uncompensated of Compensated transmission lines	L-58	<b>T3 : 1.4</b>
Shunt compensation	Shunt compensation	L-59	<b>T3 : Ch4</b>
Series compensation	Shunt compensation	L-60	<b>T3 : Ch4</b>
TUTORIAL	Problems	L-61

**Session Plan**

**Programme** : B.TECH

**Year** : III Year

**Semester:** II Sem

**Subject Name:** Electrical and Electronics Instrumentation

**Code:** A60223

**Faculty Name:** Ganji Srikant

**Designation** : Sr.Asst. Professor

Sl No	Topics as per JNTU syllabus	Modules/sub modules for each Topic.	Lecture No	Text Books/ Reference Books	Remarks
1	Overview	Its is aimed to introduce to the students the principles and application of Control System	L1		
2	Applications and Extensions	The significance of the course is it is an important aspect of installation, operation and performance qualifications respectively of any electrical system	L2		
3	Necessary Background	measurement of electrical functions like voltage, current, power, energy, frequency, magnetic flux and magnetic intensity	L3		
<b>UNIT – I</b>					
4	Introduction to Measuring instruments	Introduction and overview of syllabus	L4	JNTU Syllabus	GATE IES
		Classification: Absolute & Secondary. Null & deflection type. Analog and Digital. D.c., a.c., a.c& d.c. Indicating, recording and integrating. Based on magnetic, thermal, electrostatic, electromagnetic and hall effects	L5	<b>T1: Ch17(634-635)</b> <b>T2:Ch1 (6-9)</b>	
	Deflecting and controlling torques	Operating forces: deflecting, controlling,	L6	<b>T1: Ch17(635-636)</b> <b>T2: Ch7(22-230)</b>	
		General construction details: Controlling and Damping Systems		<b>T1: Ch17(636-646)</b> <b>T2: Ch7((230-235)</b>	

	PMMC instruments	Ammeter and Voltmeter: PMMC construction, deflecting and controlling torque	L7	<b>T1: Ch18(665-674)</b> <b>T2: Ch7(235-240)</b>	
		Ammeter and Voltmeter: PMMC Effect of temperatures, errors and compensation, extension of range and sensitivity		<b>T1: Ch18(657-658), (710-716)</b> <b>T2: Ch9( 292-300)</b>	
	MI instruments	MI Instruments; Construction, deflection and control torque	L8	<b>T1: Ch18( 658-660)</b> <b>T2: Ch9(300-3110)</b>	
		MI Instruments; Errors, Extension of range. Adv. and Disadvantages of MI instruments		<b>T1: Ch18(660-665), (710-716)</b> <b>T2: Ch9(312-323)</b>	
	Extension of range of Electrostatic voltmeters	Electrostatic Meters: force and torque eqns, Quadrant type and Attracted disc type and extension of range	L9	<b>T1: Ch18(681-692)</b> <b>T2: Ch9(325-345)</b>	
	ACTIVITY 1	GROUP DISCUSSION	L10		
	ACTIVITY 2	POSTER PRESENTATION	L11		
	ACTIVITY 3	QUIZ -1	L12		
<b>UNIT – II</b>					
2	<b>POTENTIOMETERS &amp; INSTRUMENT TRANSFORMERS</b>	Principle and operation of D.C Crompton's potentiometer	L13	<b>T1: Ch15(265)</b> <b>T2: Ch10(384-390)</b>	GATE IES
		standardization – Measurement of unknown resistance		<b>T1: Ch19(716-720)</b> <b>T2: Ch10(390-397)</b>	
		Measurement of current, Voltmeter	L14	T1: Ch19(721-735) T2: Ch10(400-406)	
		A.C. potentiometers polar and coordinate type standardization		T1: Ch19(735-743) T2: Ch10(411-418),	
		applications	L15	T1: Ch19 (743-761) T2: Ch10(390-410)	
		Problems	L16		
	CT & PT	CT and PT – Ratio and phase angle errors.	L17	T1: CH22 (872-877) T2: CH13 (495-500)	

		NUMERICALS	L18		
	ACTIVITY 1	GROUP DISCUSSION	L19		
	ACTIVITY 2	POSTER PRESENTATION	L20		
	ACTIVITY 3	QUIZ -2	L21		
<b>UNIT- III</b>					
3.	<b>MEASUREMENT OF POWER &amp; ENERGY</b> LPF and UPF	Single phase dynamometer wattmeter LPF and UPF	L22	T1:CH20 (779-789) T2:Ch11 (430-440)	GATE IES
	Extension of wattmeter	double element and three element dynamometer wattmeter, expression for deflecting and control torques Extension of range of wattmeter using instrument transformers	L23	T1:CH20 (768-770) T2:CH11(442-444)	
	Active power measurement	measurement of active and reactive powers in balance and unbalanced system.	L24	T1:CH20(799-804), 772-779 T2:CH11 (445-450)	
	Reactive power measurement	Measurement of reactive power	L25	T1:Ch20 (804-805) T2:CH11 (453-457)	
		problems			
4	<b>MEASUREMENT OF ENERGY</b>	1-phase induction type energy meters: Construction, theory & operation	L26	T1:CH21 (821-822) T2:CH12 (463-470)	GATE IES
	Induction type energy meter	1-phase induction type energy meters: Different adjustments	L27	T1:Ch21 (822-824) T2:CH12 (473-478)	
	Driving and breaking torques	1-phase induction type energy meters: Errors 1-phase induction type energy meters: Phantom loading test	L28	T2:CH12 (478-486)	
	3-Ph energy measurements	3-phase energy meters, maximum demand indicators & trivector meter	L29	T1:CH21 (824-825,841-849,851-852) T2:CH12 (486-490)	
		problems			
	ACTIVITY 1	GROUP DISCUSSION	L30		
	ACTIVITY 2	POSTER PRESENTATION	L31		
	ACTIVITY 3	QUIZ -3	L32		
<b>UNIT – IV</b>					
5	<b>D.C &amp; A.C BRIDGES</b>	Methods of measurement of low resistance	L33	T1:CH8 (341-343) T2:CH15 (558-563)	

		Kelvin's Double Bridge		T1:CH8 (344-345) T2:CH15 (564-572)	GATE IES
	Resistance measurement	Methods of measurement of medium resistance	L34	T1:CH8 (354-357) T2:CH15 (574-580)	
	sensitivity	Wheatstone Bridge method		T1:Ch8 (359-360) T2:CH15 (582-584)	
		NUMERICALS		T2:CH15 (581)	
	Medium resistance	Methods of measurement of medium resistance	L35	T1:CH8 (360-367) T2:CH15 (573)	
		Carey Foster slide wire bridge	L36	T1:Ch8(367-368) T2:CH15 (570)	
		Measurement Of High Resistance: Loss of charge method		T1:CH8 (368-369) T2:CH15(572)	
		problems	L37		
<b>UNIT – V</b>					
6	Measurement of inductance factor	maxwell's beidge	L38	T1:CH7 (286-290) T2: CH 14 (516-520)	GATE IES
		Hay's bridge.	L39	T1: CH 7 (290-295) T2: CH 14(520-524)	
		Anderson's bridge		T1CH7(:297-298) T2: CH 14(524-528)	
		Owen's bridge	L40	T1: CH 7 (298-303) T2: CH 14 (529-533)	
	Measurement of capacitance and loss angle	De Sauty Bridge, Schering Bridge	L41	T1: CH 7 (304-306) T2: CH 14 (534-538)	
		Wein'sBridge.		T1: CH 7 (315-319) T2: CH 14 (539-544)	
	ACTIVITY 1	GROUP DISCUSSION	L42		
	ACTIVITY 2	POSTER PRESENTATION	L43		
	ACTIVITY 3	QUIZ -4	L44		
<b>UNIT – V</b>					
7	<b>Transducers and oscilloscopes</b> Definition, Classifications and advantages	Introduction, transducer definition, Different types of transducers, Primary transducers and secondary transducers, passive and active transducers	L45	<b>T3: 25.6</b> <b>T4 : 25.8</b>	GATE IES
	Characteristics of transducers and selection of transducer	Characteristics of transducers, input characteristics, transfer characteristics and output characteristics, factors influencing the choice of transducers	L46	<b>T2 : 25.9</b>	
	Resistive transducers	Passive Electrical transducers, Resistive transducer working principle,	L47	<b>T3 : 6.1</b>	

		applications, Hot wire resistance transducer, Resistive displacement transducers, resistive strain transducers, resistive pressure transducers, resistive moisture transducers, resistive optical radiation transducers.			
	Inductive Transducers	Working principle of Inductor Transducer, Inductive thickness transducers, inductive displacement transducer, movable core type inductive transducers, eddy current type transducer.	L48	T3 : 6.2	
	Capacitive Transducers	Working principle of Capacitor transducers, capacitive thickness transducer, capacitive displacement transducer, capacitive moisture transducer.	L49	T3 : 6.3 T4 : 25.28	
	LVDT and Applications	Working principle of LVDT transducer and Applications		T3 - 6.23 T4 : 25.24 T4 : 25.24.3	
	Strain gauge and its principle of operation, Gauge factor	working principle, types of strain gauges, operation resistive strain gauges, Bonded wire and Unbonded metal stain gauges, gauge factor		T3 : 6.14 T4 : 25.17	
	Thermistors, Thermocouples, Synchros	Thermistor working principle and operation, thermocouple construction, working principle and operation, rotary variable differential transformer, synchros construction operation.	L50	T3 : 7.1 T4 : 25.26	
8	photovoltaic, photo conductive cells, photo diodes	Photo electric phenomenon, photo conductive transducer construction and operation, photovoltaic transducer construction and operation, photo diode transducer construction and operation.	L51	T3 : 7.6	GATE IES
	Cathode ray oscilloscope	Introduction, Basic Principle, Cathode ray tube construction, Characteristics	L52	T3 : 21.1 T3 : 21.2	

		of CRO, Types			
		time base generator block diagram and operation, Vertical amplifier block diagram and operation	L53		
	Applications of CRO	Measurement of phase and frequency using CRO by luscious patterns	L54	T3 : 21.13 T3 : 21.14.1 T3 : 21.20	
	Sampling oscilloscope	Analog and Digital	L55	T3 : 21.14.2 T3 : 21.26.2 T3 : 21.22	
	ACTIVITY 1	GROUP DISCUSSION	L56		
	ACTIVITY 2	POSTER PRESENTATION	L57		
	ACTIVITY 3	QUIZ -5	L58

2016-17**

**Session Plan**

Programme : B.TECH

Year : IV

Semester: I

Subject Name : CAD/CAM

Code: A70328

Faculty Name : Mr. CHANDRA SHEKAR GOUD

Designation : ASSOCIATE PROFESSOR

S.no	Topics as per the JNTU syllabus	Sub-Topics	Lecture No.	Suggested Books (Page. no.s)	Remarks
1.	<b>Overview</b>	<b>Subject Overview Unit wise</b>	<b>L1</b>		
2.	<b>Application and Extensions</b>	<b>CAD/CAM</b>	<b>L2</b>		
<b>UNIT 1(A): FUNDAMENTALS OF CAD/CAM</b>					
3.	CAD/CAM Basics	• Fundamental of CAD/CAM	L3	R2(3,4)	Design Field
		• Automation	L4	T1(29)	
4.	Design process	• Cad Design	L5	R2(25)	
		• Applications	L6	R2(38)	
5	Applications for computers for design	• Role of computers in design field	L7	T1(80)	
		• Applications of computers in design field	L8	T1(81)	
6	Benefits of CAD	• Industrial and domestic benefits	L9	T1(88)	
7	Computer configuration for CAD application	Computer configuration –basics	L10	R2(35)	
		Configurations for CAD installation	L11	R2(36)	
8	Coputer peripherals for CAD	• Computer peripherals for CAD	L12	R2(38)	
		• Examples of some systems	L13	R2(39)	
9	Design Workstation	• Design Workstation –basics	L14	T1(102)	
10	CAD Software	• System software and application software-definitions	L15	R2(82)	
			L16	R2(82)	
<b>UNIT 1(B): WIRE FRAME MODELLING</b>					
11	Wire frame modeling	• 3D Wireframe modeling-entities with definitions	L17	R2(137)	Working with software
		• Interpolation and approximation of curves	L18	R2(269)	

S.no	Topics as per the JNTU syllabus	Sub-Topics	Lecture No.	Suggested Books (Page. no.s)	Remarks
12	CURVES	<ul style="list-style-type: none"> <li>• Concept of parametric and non parametric representation of curves</li> </ul>	L19	R2(268)	
		Definition of Cubic spline <ul style="list-style-type: none"> <li>• Bezier</li> <li>• B-Spline</li> </ul>	L20	R2(200)	
<b>UNIT II (A): SURFACE MODELLING</b>					
13	Representation of models	<ul style="list-style-type: none"> <li>• Algebraic and geometric representation.</li> </ul>	L21	R2(218)	Working with complex models
		<ul style="list-style-type: none"> <li>• Parametric space</li> <li>• Blending functions.</li> </ul>	L22	R2(335)	
		<ul style="list-style-type: none"> <li>• cylindrical surface</li> <li>• ruled surface</li> </ul>	L23	R2(336)	
		<ul style="list-style-type: none"> <li>• Spherical surface</li> <li>• composite surface</li> </ul>	L24	R2(340)	
		<ul style="list-style-type: none"> <li>• Bezier surface</li> </ul>	L25	R2(340)	
		<ul style="list-style-type: none"> <li>• Regenerative and pathological conditions</li> </ul>	L26	R2(340)	
14	Representation of models Complex				
<b>UNIT II(B) : SOLID MODELLING</b>					
15	Solid modeling	<ul style="list-style-type: none"> <li>• Definition of cell composition and spatial occupancy</li> </ul>	L27	R2(320)	Working with software's
16	Sweep –basic concepts	<ul style="list-style-type: none"> <li>• Representation of sweep</li> </ul>	L28	R2(398)	
		<ul style="list-style-type: none"> <li>• Applications</li> </ul>	L29	R2(401)	
17	Solid geometry	<ul style="list-style-type: none"> <li>• Concept</li> <li>• Constructive solid geometry</li> </ul>	L30	R2(411)	Working with software's
		<ul style="list-style-type: none"> <li>• Applications</li> </ul>	L31	R2(411)	
18	Boundary representation	<ul style="list-style-type: none"> <li>• Definition of boundaries</li> </ul>	L32		Working with software
		<ul style="list-style-type: none"> <li>• Mode of representing boundaries</li> </ul>	L33		
<b>UNIT III: NC PRODUCTION CONTROL SYSTEMS</b>					
19	Numeric Control	Numeric Control	L34	T1(175)	Design
		<ul style="list-style-type: none"> <li>• Elements of NC system</li> <li>• NC Part Programming</li> <li>• Methods of NC part programming</li> <li>• Manual Part Program</li> </ul>	L35	T1(179)	
			L36	T1(179)	
20	Computer Assisted Part Programming	<ul style="list-style-type: none"> <li>• Computer Assisted Part Programming</li> </ul>	L37	T1(354-355)	

S.no	Topics as per the JNTU syllabus	Sub-Topics	Lecture No.	Suggested Books (Page. no.s)	Remarks
		<ul style="list-style-type: none"> <li>• Post processor</li> <li>• Applications</li> </ul>			
21	Programming language	<ul style="list-style-type: none"> <li>• SPPL- A simple programming language</li> <li>• CNC and DNC adaptive control systems</li> </ul>	L38 L39	T1(201) T1(232,239)	
<b>UNIT IV(A): GROUP TECHNOLOGY</b>					
22	Group technology	<ul style="list-style-type: none"> <li>• Part families</li> <li>• Part classification and coding</li> <li>• Product flow analysis</li> <li>• Machine call design</li> </ul>	L40	T1(297,298,301,328)	Manufacturing
<b>UNIT IV(B): COMPUTER AIDED PROCESS PLANNING</b>					
23	CAPP	<ul style="list-style-type: none"> <li>• Computer aided process planning</li> <li>• Difficulties in traditional process planning</li> <li>• Retrieval type and generative type</li> <li>• Machinability data systems</li> </ul>	L41	R2(770,774,776)	Manufacturing
<b>UNIT IV(C): COMPUTER AIDED MANUFACTURING RESOURCE PLANNING</b>					
24	Computer Aided Manufacturing Resource Planning	<ul style="list-style-type: none"> <li>• Material Resource Planning Inputs to MRP</li> <li>• MRP output Records</li> <li>• Benefits of MRP</li> <li>• Enterprise Resource Planning Capacity requirement planning</li> </ul>	L42 L43	T1(345,364,369,373)	Manufacturing service
<b>UNIT V(A) : FLEXIBLE MANUFACTURING SYSTEMS</b>					
25	Flexible Manufacturing Systems	<ul style="list-style-type: none"> <li>• FMS Equipment</li> <li>• FMS Layouts</li> <li>• Analysis Methods for FMS</li> </ul>	L44	R2(703,793)	Manufacturing
<b>UNIT V(B): COMPUTER AIDED QUALITY CONTROL</b>					
26	Automated Inspection	<ul style="list-style-type: none"> <li>• OFF Line</li> <li>• ON Line</li> <li>• Contact</li> <li>• Non-Contact</li> </ul>	L45	T1(28-31)	Quality and Robotics
27	Coordinate Measurement Machine	<ul style="list-style-type: none"> <li>• CMM</li> <li>• TYPES</li> <li>• Applications</li> </ul>	L46		Manufacturing

S.no	Topics as per the JNTU syllabus	Sub-Topics	Lecture No.	Suggested Books (Page. no.s)	Remarks
		<ul style="list-style-type: none"> <li>Machine Vision</li> </ul>			
<b>UNIT V(C):COMPUTER INTEGRATED MANUFACTURING</b>					
28	Computer Integrated Manufacturing	<ul style="list-style-type: none"> <li>CIM system</li> <li>Benefits of CIM</li> </ul>	L47	T1(463-480)	Manufacturing

**TEXT BOOKS:**

T1: CAD/CAM /Groover M.P.I Pearson education.

T2: CAD/CAM Concepts and Applications! Alavala? PHI.

SNO	Topics As Per JNTU Syllabus	SUB TOPICS	Lecture No.	Date	Suggested Books(Page Nos)	Remarks
1	Overview	Subject Overview Unit Wise	L1			
<b>UNIT -1 BEARINGS</b>						
2	Introduction of bearings	Introduction	L2 L3		R4(17.1-17.2) R4 (17.4-17.5) P1(557-558)	
		Types of bearings				
		Classifications of bearings				
		Applications				
3	Types of Journal Bearings	Full Journal bearing	L4		R4 (17.2-17.3) P1(591)	
		Partial Journal Bearing				
4	Basic mode of lubrication	Lubrication	L5 L6		R4(17.6-17.10) P 1 (590) P1 (614) P1 (596-597) P1 (599)	
		Properties				
		Clearance ratio and Bearing modulus				
		Heat dissipation of bearings				
5	Bearing materials.	Bronze	L7 L8		R4(17.5-17.6) P1 (624)	
		Cast Iron				
		Silver				
		Babbitt material				
6	Journal Bearing	Design procedure	L9 L10		P1 (613) R 4 (17.11-17.16) R4(17.18-17.19) R4 (17.27-17.38)	
		Design of hydrodynamic journal bearing				
		Problem of Journal Bearing				
7	Ball and Roller bearing	Introduction Advantages, Disadvantages and applications.	L 11 L12		R4(18.1-18.5) R4(18.9) P1 (556-559)	
		Types of radial ball bearing				
		Types of roller bearing Life of bearing				

8	Bearing load	Static and dynamic load	L13		R4(18.10-18.12) P1 (561) P1 (563)		
		Calculations of bearing load in gear drives,					
		Calculations of a bearing load in belt drives.	L14				
9	Equivalent radial load	Combined bearing load,	L15		P1 (566) R4(18.18-18.19)		
		Design of variable loading,					
		Problems					
10	Design considerations	Design consideration	L16		R4 (18.15-18.18) R4 (18.31-18.45)		
		Design and selection of ball and roller bearing,					
		Problems	L17				
<b>Unit –II Design of IC Engine Parts</b>							
11	I.C. engine parts	Introduction	L18		P1(802-804) R4(13.1-13.7)		
		Classification of IC engines					
		Terminology					L19
		Working of IC Engine					
		Design of IC engine					
12	Connecting rod	Introduction	L20		R4 (14.9-14.10) R4 (14.13-14.15) R4 (14.18) R4(14.18-14.27) P1(825-836)		
		Forces on connecting rods & inertial load,					
		design of connecting rod,					L21
		connecting rod inertia effects on connecting rods,					
		Problems on connecting rod.					L22 L23
13	Crank shafts	Introduction	L24		R4 (15.1) R4 (15.1-15.2) R4 (15.2-15.3) R4 (15.11-15.12) R4(15.12-15.24) P1(837-847)		
		Types of crank shaft					
		Design of overhung crank shafts, crank pin,	L25				
		crank shaft bearings, crank web, Problems					
14	Piston	Introduction,	L26		R4 (14.1-14.2) R4 (14.2-14.3)		
		Materials and structure and colum analysis.					
		Formulas used for designing piston rod.					
15	Forces acting on piston	Euler's formula	L27		R4(14.4-14.7) P1(812-825)		
		Rankin's formula					
		Johns Formula					

16	Design of piston	Design procedure	L28		P1(812-825) R4(14.7-14.8)	
		Problems on piston	L29			
<b>UNIT-3 POWER TRANSMISSION SYSTEMS AND PULLEYS</b>						
17	Transmission of power by belt and rope ways.	Introduction, transmission efficiency,	L30		R4(21.1)	
18	Belts	Introduction	L31		R4(21.3) R4 (21.3-21.4) R4 (21.5-21.6) R4(21.5) P1(495-498)	
		Classification of belts				
		Types of belts,				
		Materials used for belts				
19	Flat belts	Advantages and Disadvantages	L32 L33 L34		R4(21.6) R4(21.7-21.8) R4(21.9-21.13) R4(21.13-21.19) R4(21.19) R4(21.24-21.34) P1(508-516)	
		Introduction				
		Types of flat belts				
		Working characteristics design consideration				
20	V-belts	Design of flat belts	L35 L36 L37		R4(22.1) R4(22.2-22.3) R4(22.4) R4(22.19-22.27) P1(516-533)	
		Problems				
		Introduction				
		Materials				
21	Ropes	Design of v belts,	L38 L39		R4(24.1-24.4) R4(24.6) R4(24.13-24.14) R4(24.17-24.24) P1 (787-793)	
		Advantages and Disadvantages,				
		Problems on v-belts				
		Introduction,				
22	Pulleys	construction,	L40		P1 (511-518)	
		Designation,				
		stresses in ropes,				
		Design of wire ropes,				
23	Materials	selection procedure,	L41		R4 (21.20-21.24) R4(21.24-21.34)	
		Problems on wire rope				
		Materials for flat pulley				
		Materials for V-Pulleys				
		Design of CI pulleys	L42 L43		R4 (23.1-23.8) R4(23.6-23.8) R4 (23.20-23.25)	
		Problems on V-pulleys				
		Introduction,				
		Advantages, disadvantages				
		Classification and components,				

24	Chain Drives	roller chains, design of chain drives, problems on chain drives			P1(537-554)	
<b>UNIT-4 GEARS</b>						
25	Gears	Introduction Types of gears Classification of gears Terminology of gears Nomenclature of gears	L44		R4(25.1-25.7) R4(25.8-25.10) P1(635-641)	
26	SPUR GEARS	Introduction Load Concentration Factor Design of spur gear dynamic load factor Analysis of spur gear check for plastic deformation Check for dynamic deformation Problems on spur gears	L45  L46  L47		R4(25.29-25.25.50) R4 (25.53-25.57) R4 (25.60-25.84)	
27	Helical gear	Introduction Load concentration Factor, dynamic factor, analysis of helical and bevel gear, check for plastic deformation, check for dynamic and wear consideration, problems on helical	L48  L49  L50		R4(26.1-26.2) R4(26.5-26.6) R4(26.7-26.9) R4(26.9-26.16) P1(680-682)	
28	Bevel gear	Introduction Strength of bearing gear Construction details Bearing loads AGMA Equation factors Design procedure Problems on bevel gears	L51  L52		R4(27.1-27.4)) R4(27.4-27.6)  R4 (27.6-27.10) R4(27.10-27.17)	
29	Worm gear	Introduction Properties of worm gear selection material, strength and wear rating of worm gear, force analysis and friction in worm gears, Problems	L53  L54  L55 L56		R4(28.1-28.4) R4(28.5-28.7) R4(28.12-28.13) R4 (28.13-28.23)	

UNIT-5 DESIGN OF POWER SCREWS						
30	Design of screw	Introduction	L57		R4 (31.1-31.15) R4(31.16-31.17) R4(31.17-31.31) P1(186-190) P1(197-199)	
		Materials				
		Form of threads				
		Force analysis and types of threads				
		Nomenclature of screw	L58 L59			
		Working principle				
		Design consideration				
		Design of power screw				
		Problems on design of screw				
31	Design of Nut	Introduction	L60		R4(8.1) R4(8.18) P1(192-212)	
		Height of nut				
		Length of nut				
		Energy loss in nut				
		Problems on nut				
32	Compound Screw	Introduction	L61		P1(219-222)	
		Torque				
		Friction				
		Efficiency				
		Problems on compound screw				
33	Differential Screw	Introduction	L62		P1(219-222)	
		Torque calculation				
		Efficiency calculation				
34	Ball Screw and failures	Introduction	L63		P1(222-223)	
		Advantages				
		Loading of Ball screws				
		Applications				

**Text Books:**

1. Machine Design/Pandya & Shah/ Charotar Publishing House Pvt.
2. Machine Design/ PV Soundaryarajan Murthy and N. Shanmugam/ Anuradha Publishers.

**Reference Books:**

1. Design of Machine Elements/ V M Faires.
2. Machine Design/ Schaum Series.
3. Mechanical Engineering Design/ JE Shigley.
4. Machine Designs/ Md. Jalaluddin / Anuradha Publishers.
5. Machine Design/ UC Jindal/Pearson
6. Design of Machine Elements (vol 1)/ T.Krishna Rao/ IK International Publishing house/ 2<sup>nd</sup> Edition.

**Preferred Books**

1. Design of Machine Elements /VB Bhandari/ 4<sup>th</sup> Edition
